

## Boat Docks

Residential and commercial manufacturer and installer of low maintenance aluminum boat docks and gangways using Trex Decking, polyethylene floats and roller systems. This combination virtually eliminates maintenance and increases the dock's longevity.

Our company also specializes in securing the necessary permits from Army Corps of Engineers; to the removal and disposal of your existing dock and gangway; to pile driving of 3" and 4" pipe. We can do it all!

For dock quotes or information contact Sandie Rock
